

## Manchester Bollards, 2006

Photos from CCTV footage (search on *YouTube* for “Manchester Bollards”) of motorists attempting to drive over the automatic bollards, which retract for public transport.

1. The silver car cannot get past the bollards.
2. A bus arrives, and the bollards automatically retract below the road surface.
3. The silver car tries to rush through behind the bus, but is caught by the rising bollards.
4. Later, a four-by-four tries to rush through, before the bollards have risen fully.
5. The rising bollard catches the four-by-four underneath!
