

Past Paper Credit 2005

Help Sheet

Use your booklet Urban Land Use to help you answer the question.

- Go to P.11 AND P.12- this will help you identify areas A and B on the past paper question
- Then write your first sentence

Area A is the _____ because the street pattern is _____, but Area B is the _____ because the street pattern is _____

- Go to P.9 and P.13 and use the information to describe the Suburbs and Inner City and say why they are different from the Inner City
- Reasons could be to do with:
 - the age of the housing eg suburbs 20th Century and Inner City 19th Century
 - The quality of the environment eg Inner City polluted and congested due to volume of cars
 - Street pattern different due to Suburbs having a planned street pattern due to lots of space eg curvilinear streets, crescents and cul-de-sacs and Inner City street pattern grid iron
 - Location - suburbs different because next to the countryside and inner city next to CBD
